

Phase 8: Project Demonstration

Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

Team ID	SWTID-2026-3502	Team Size	5
Team Leader	Harini R	Platform	ServiceNow Flow Designer
Team Members	Mohamedanass, Prawin kumar D, Devisri.G, R.depeka	Project Type	Process Automation (ITSM / Service Catalog)

1. Demonstration Objective

The demonstration shows that placing and approving a standard laptop order automatically produces a configuration task for the Hardware team, with no manual task creation.

2. Pre-Demo Checklist

- Flow "Standard laptop task" is Active.
- Standard Laptop Process Engine shows the flow.
- Hardware assignment group exists.
- Browser logged in to the ServiceNow instance with the required roles.

3. Demo Script

Step	Presenter action	What the audience sees
1	Introduce the problem and objective	Manual configuration delays and the goal of automation
2	Open Flow Designer and show the flow	Service Catalog trigger and Create Catalog Task action with field values
3	Open Maintain Items > Standard Laptop > Process Engine	Flow "Standard Laptop task" attached to the item
4	Open Service Catalog > Hardware > Standard Laptop and click Order Now	Order Status page with request number
5	Open the request and approve under Approvers	Approval state changes
6	Open the Requested Item and the Catalog Tasks tab	New task with Hardware assignment group
7	Open the catalog task	Short description and Description set to Laptop needs to Configured, Approval Approved
8	Show Flow Designer Executions	Successful run of the flow

4. Demonstration Results

Check	Result
Request created	REQ0010001
Requested item created	RITM0010001
Catalog task auto-created	SCTASK0010001
Assignment group	Hardware
Manual task creation needed	None

5. Key Takeaways

- Standard laptop orders now produce configuration tasks automatically.
- The Hardware team receives work in its queue without manual follow-up.
- The solution is low-code, visual and easy to extend.

6. Anticipated Questions and Answers

Question	Answer
Why Flow Designer instead of Workflow Editor?	It is the current ServiceNow standard, visual and easier to maintain
Why run as System User?	So the task is created reliably regardless of the requester's access
Can this work for other items?	Yes, the same flow pattern can be attached to other catalog items
What if the flow is inactive?	No task is created, so the flow must show Active

7. Conclusion

By automating the standard laptop procurement process with ServiceNow's Flow Designer, the project addresses inefficiencies and reduces manual overhead. The workflow ensures timely configuration of laptops, minimises user wait times and improves productivity within the IT department. It also optimises resource allocation and gives users a seamless and efficient procurement experience.
